1.5 CPE credits

Parking revenue remains the largest non-airline revenue source at North American airports. With the evolution of the ground transportation revenue model over the past several years which has seen TNC’s increasingly impact parking revenues, it is imperative that airports understand the next evolution in parking which is to move from a fixed rate parking model, to a variable rate model. The future airport commercial parking model will utilize many of the same revenue management techniques utilized by both airlines and hotels for decades. This session will provide an overview of the efforts currently underway at multiple North American airports to move towards a variable rate model, the expected benefits as well as the challenges which those airports expect to face.

1.5 CPE credits
Joint Finance & Concessions Session

Many airports have vacant land acquired for noise abatement or other purposes. This land can be developed for compatible purposes resulting in significant revenue to the airport. Different dynamics on mixed commercial land use and land development are key drivers in delivering local economy benefits. The recent FAA Reauthorization Bill included regulatory reform of eliminating the requirement for FAA approval in order for airports to dispose, use, or lease non-airfields property purchased without federal funding, thus allowing airports greater flexibility for developing and disposing of land. This session will provide examples of development ideas and strategies that airports can use.

3:45pm – 5:00pm Session 3C: Rates and Charges: Current Trends and Case Studies

1.5 CPE Credits

North American airports are trying to address congested facilities resulting from increases in traffic and the need to replace or upgrade aging facilities in the context of stagnant AIP funding levels, tapped out PFC capacity for the foreseeable future, and increasingly leveraged balance sheets. Meanwhile, airlines claim a PFC increase is not needed because they have “committed to pay for airport bonds through their own rents and fees rather than impose higher taxes on passengers.” Yet airlines resist increases in airport rates and charges. This session will explore how different airports addressed this challenge through their negotiations with airlines and selection of ratemaking regimes. We will explore the different ways to approach the business relationship (airline agreements vs. rates by resolution) and emerging hot topics in negotiations (common use bag formulas, turn fees, equalized holdroom fees, assignment and access to gates, terminal-wide common use systems, low cost terminals, etc.) Bring your questions for our expert panel of airport managers, consultants, and lawyers who have recent first-hand experience.
