**AIRPORT CONSTRUCTION STRATEGY SUMMIT:
 DESIGNING & DELIVERING A BETTER AIRPORT FUTURE**
 Doubletree at Sea World • Orlando, Florida
 May 19-20, 2020

Tuesday, May 19, 2020

8:00am – **Registration**
 4:00pm

8:00am – **Networking Breakfast**
 9:00am

9:00am – **Welcome and Introduction**
 9:15am

9:15 am – **The Evolving Project Delivery Landscape**
 10:30am
What are the alternatives to traditional project delivery methods and is your organization ready to use them? In this session, get the latest information on what the different delivery methods encompass and why these methods could be right (or wrong) for your next project.

Moderator/Presenter: Mike Kenig, Vice Chairman, Holder Construction

10:30am – **AM Networking Break**
 10:45am

10:45am – **Aligning Procurement Processes with Project Delivery Methods - Keys to a Successful Project**
 12:00pm

Before they can start design or construction, Airport operators face often complex and time consuming procurement processes and requirements. Use of project delivery methods other than conventional, sequential design-bid-build must be carefully aligned with these processes to achieve their desired benefits. In this session, we'll discuss ways in which airport operators and their project delivery teams have worked together to align procurement and project delivery successfully.

Moderator: Roger Johnson, Airport Program Executive, Jacobs

12:00pm – **Networking Lunch**

1:15pm –
 2:30pm

It Starts with People—Building Your Project Delivery Team

Project delivery methods like conventional design-build, progressive design-build, construction management at risk, and integrated project delivery require the right people both from the owner and the delivery team. Using case studies, we'll discuss the critical people and skill sets needed from both sides and how these need to change depending on the delivery method.

Moderator: Shane Harbinson, Assistant Director, City of Austin Aviation Department

2:30pm –
 3:00pm

PM Networking Break

3:00pm –
 4:15pm

Risk Management and Project Delivery

Project delivery professionals have to manage an array of risks during planning, design, construction—and ultimately implementation—of the projects with which they're involved. In this session, we'll discuss the nature of a number of these risks, effective risk management techniques, and the intrinsic linkages between project delivery methods and risk management.

Moderator: Frank Giunta, Partner, HKA

4:15pm –
 5:15pm

Insuring Projects in Today's Delivery Environments

Networking Breakfast

8:30am –
 8:45am

Recap from Tuesday's Sessions

8:45am –
 10:15am

Effectively Managing the Design Process

Design process management is important in any major capital project, but even more so under project delivery methods where design occurs concurrently with construction or takes place within a broad project delivery team. In this session, we'll enumerate critical elements of design process management and how these translate into roles and responsibilities for owners, designers, and contractors under various delivery methods. We'll pay particular attention to how owners and contractors can be effectively involved in design processes from project inception to completion.

Moderator: Dwight Pullen, Senior Vice President, Skanska

10:15am –

Getting to “Best Value” in Project Delivery -- Roles of Contractors, Designers, and Owners

The concept of “best value” in capital project delivery has long been recognized, but differences abound regarding what the term “best value” actually means. In this session, we’ll confront these differences head on and provide insight into how owners, program managers, designers, and contractors can reach a common understanding of “best value” and use it to drive successful projects.

- Program definition & scoping considerations
- Contract incentives—What are they and how can they be structured to contribute to project success?
- Owner role: Airports, Airlines, Third-Party Developers
- Life cycle considerations
