## INTRODUCTION

The Gerald R Ford International Airport Authority (GFIAA) is requesting proposals from interested firms to **provide, operate and maintain** an intuitive, centralized online parking reservation platform for 8,119 public parking spaces. ## SOLICITATION AND PROJECT SCHEDULE

ACTIVITY	DATE
RFQ Issue Date	September 17, 2020
Question Deadline	October 8, 2020
Submission Due Date	October 13, 2020 at 2 pm (local)
Contract Start Date	December 2020

GFIAA reserves the right to modify the deadline set forth in the above table in its sole discretion. Any such modifications will be stated in an addendum and posted on the Authority website. It is the Respondent’s responsibility to monitor the website for status updates.

## WORK SCOPE

The Proposer will create, operate and maintain an intuitive, centralized online parking reservation platform that integrates seamlessly into the Airport’s current website and mobile application. The selected platform should be convenient, efficient, secure and reliable while protecting user’s data through encryption. It must be designed carefully to describe parking options, costs, locations and EV charging to allow guests to make informed choices but must also be robust enough to handle the convergence of multiple events with minimal system outages and or glitches. Importantly, the system should provide a coordinated approach to finding convenient parking while driving incremental revenue throughout the Airport’s parking program using creative techniques including but not limited to dynamic pricing and upselling.

This system must be guest friendly, easy to navigate and provide users with a simple one-stop site to arrange and pay for parking and exit. Once established, information and updates about the reservation system must be disseminated through a clear, concise, and wide-ranging marketing campaign coordinated with the Airport to maximize use and to ensure its effectiveness. GFIA will facilitate coordination with venue operators and will also coordinate with elements of the operating plan.

Recommendations on the most functional system should include options such as the most efficient internet access, advertising and real-time information dissemination support, a plan to accommodate vehicles without pre-booked reservations, staffing requirements with hours of operation, and a preliminary financial plan that includes fees, payment and processing information, and website integration; describe an information dissemination and marketing strategy including digital, social media, press strategy and promotional links; and provide details on customer information capture, loyalty programs and transaction and revenue trends.
