Plenary Session 2: Airlines in a Post-Pandemic Environment

In the U.S. and in growing measure in Canada, airports' airline partners had begun seeing positive signs for industry recovery with the wane of the Delta and Omicron variants of COVID 19 and associated reductions in domestic and international travel restrictions. However, the war in Ukraine, associated shocks to fuel prices, other inflationary pressures, and workforce issues—among other challenges—will continue to challenge the industry as we move through this recovery. In this session, get the latest assessments about these challenges and insights into they'll impact air service, airport planning, and airport operations.

Moderated by Heidi Benaman, Senior Project Manager, Faith Group LLC

John Heimlich, Vice President & Chief Economist, Airlines for America

Justin Meyer, Deputy Director of Aviation—Marketing and Air Service Development, Kansas City Aviation Department
