Solicitation Type and Name: **Construction Manager at Risk – Airfield Safety Enhancement and Improvements Program**

Solicitation Number: RFQ 2024-132

Description: The City of San Antonio (City) and the San Antonio Airport System (SAT) recently completed the San Antonio International Airport (SAT or Airport) Strategic Development Plan (SDP), also known as the Master Plan. Based on current growth, future growth demands, and key stakeholder engagement with Joint Base San Antonio and the Federal Aviation Administration (FAA), SAT has identified the critical need for the implementation of the airfield development of new facilities and redevelopment of existing facilities. This development is needed to support current and future aircraft demand, airspace management and safety, and efficiency throughout the National Airspace System (NAS). To support these goals, SAT has initiated the Airfield Safety Enhancement and Improvements Program (ASEIP). The ASEIP will consist of two (2) phases. Phase 1 will consist of enabling projects, rehabilitation of the primary runway, construction of the alternate landing and departure surface to the primary runway, construction of supporting parallel taxiway systems, drainage, electrical, NAVAIDs, vehicle service roads, controlled access systems, pavement marking, signage, and airfield lighting systems, as further described in Section II below (the Project). This Request for Qualifications (RFQ) is for the Project. Phase 2, which the City will address via a subsequent procurement(s), will consist of enabling projects, reconstruction of the primary runway, redevelopment of supporting taxiway systems, drainage, electrical, NAVAIDs, pavement marking, signage, and airfield lighting systems.

Applicable Product Categories:

- 91327 - Construction, Highway and Road
- 91438 - Electrical
- 90976 – Site Work (Incl. Site Clean-Up)
- 91875 – Management Consulting
